## From the idea...

We believe that any difficult situation can give a positive input. During the emergency, which forced all of us to slow down our activities, we thought about the needs that would arise in the market. We decided not to stand by and watch but do our best even in this occasion.

Ama's electronic collection was born precisely from the need to face the extreme sanitisation and reduced contact which will be increasingly requested to all of us.

## ...to the project

To ensure these assumptions, we considered what could arise from the technical and artisan ability that always distinguishes our company and we have expanded our production in this direction.

Our creative mind, always on the move, has conceived and designed some electronic items such as faucets and dispensers of soap or disinfectant to ensure adequate prevention for everyone.

## Our offer

### MASTER COLLECTION AUTOMATIC HAND SANITIZER DISPENSER

Stainless steel dispensers that can be installed on the wall, free standing or on the pedestal, which allow you to disinfect your hands without further contact.

They are ideal in multiple structures, public or private.

### RHEA COLLECTION ELECTRONIC TAP

The electronic taps range combines the spout and soap dispenser, in order to create a minimal but functional built-in article.

### SHOWER COLUMNS

In our offer there are also shower columns with photocell suitable for installation in public outdoor areas, such as beaches, campsites, hotels.

## APPLICATION

Especially now that a simple gesture like washing your hands has become essential, we are convinced that the AMA electronic line can make a difference in many environments.

Our automatic products, in particular the automatic dispenser, can be installed in different places to ensure proper hygiene, limiting the action of germs and bacteria.

## PUBLIC AND PRIVATE ENVIRONMENTS

It is important to protect the users who frequent daily public places such as schools or hospitals, accommodation facilities such as hotels or beaches.

In the same way we want to protect all employees and partners in the workplace such as companies, bars, pharmacies.
